SMART IDEAS
TO GROW YOUR BUSINESS

About

WE WORK TO PROVIDE
YOU SUPER AWESOME STUFF

Professional Engineers Limited Company (EPRO) with its branches in UK, India was established to be one of the leading IT companies and providing the latest local, regional and international developments of integrated security and safety systems by highly skilled and qualified technical staff and expertise in the latest fields of technology.

Our mission is to help the government sectors and private sectors to facilitate their business through the use of latest software and technology solutions to improve their working process efficiency and accuracy by adopting nternational standards in implementing the projects.

We are also providing the technical solutions and consultancy services with our partners of global leading companies in different fields. We are seeking to fulfill our clients satisfaction and develop joint plan with them that aims to raise the level of productivity, tasks accomplishments and business following a client strategy and vision that meets the clients' goals, ambitions and satisfaction.

The followings are EPRO activities domain:

- Information Technology Solution Services
- Integrated Security Systems
- Safety Systems
- Solar Systems

IF YOU WANT TO BE A PRO... ACT AS A PRO.

Information Technology Solution Services

EPRO is a full service technology company. We specialize in delivering consulting, infrastructure and software development solutions that increase productivity, competitiveness and deliver cost savings. Our success is founded on our professionalism, integrity and exceptional client service by delivering the highest standard of solutions tailored to your technology needs and objectives.

Information Technology Solution Services Include:

1. **Infrastructure Solutions**

At EPRO, we provide a comprehensive range of infrastructure solutions and services to manage and maintain the infrastructure in your business at optimum levels. Our dedicated product managers design, create and implement these solutions according to your technology needs. With our extensive experience and knowledge of systems software and integrated hardware, we are able to deliver efficient, cost-effective, and highly customized infrastructure solution.

Site Survey and customer requirements
Our team makes site surveys and studies to find all project needs and prepare the technical reports for the project using international tools and standards.

Infrastructure planning and implementation

EPRO develops and implements infrastructure solutions projects based on an integration methodology through which we analyze, design, implement and test projects as per the clients requirements and budget in a specified period.

Data Center Preparation

EPRO provide the services of data centers implementation and preparation starting from making site survey and designs according to international standards for safety and security standards requirements.

Our responsibility begins with the infrastructure scope of civil and electrical works, of UPS Systems for the data center, cooling system, alarm and fire extinguishing systems, in addition to coordinating the distribution of servers and establishing a backup section and disaster recovery site.

Video/Audio Conference system

We install and install all the video /audio conference systems equipment for conference rooms. We are also doing the required preparations for the training and educational centers such as smart boards, giant screens, 3D projectors and Video/Audio Conference system.

Design and implementation of wired networks

Design, supply, installation, testing and documentation services for computer networks, information center infrastructure for computer networks, buildings floors and corporate offices that meet the client needs.

Fiber Optic Networks

Supply, installation, welding and inspection services for indoor and outdoor fiber optic cable networks and structure cabling to connect between buildings and service points.

Wireless Networks (WIFI)

Design, installation and commissioning services for indoor and outdoor wireless network (Wi-Fi) units to provide various wireless communication services in corporate offices, commercial and residential complexes, hospitals and meeting rooms.

VOIP voice and video call services solutions

Voice and video communication services over the network protocol which help in costs savings, raising competitiveness, increasing employee productivity, improving performance and customer service.

Cyber Security & Information Security

We, Professional Engineers Company, are pleased to provide the appropriate solutions to protect your information from external dangers and external unauthorized access to your information. Thus, our security specialists work to protect internal networks, servers, office computer systems or mobile phones from any type of attacks, breaches, threats that may occur.

2. Applications

EPRO uses Oracle solutions that include the below modules with the required Customization and Integrations to meet the customer business requirements.

Financial Management

Designed for creating, connecting, storing, and reporting many different types of finance transactions, financial management solutions ultimately have one core purpose.

Human Resources (Human Capital) Management

A comprehensive suite of offerings, that organizations use to manage internal HR functions such as employee data management to payroll, recruitment, benefits, training, talent management, employee engagement, and employee attendance.

Supply Chain Management

EPRO provides a Future-ready supply chain management practice to adopt with the continuously changing Supply chain rules, such as increased buyer expectations, shorter product lifecycles, new regulations, trade volatility, and fluctuating demand are testing the limits of traditional supply chains.

Enterprise Performance Management

A suite of comprehensive offerings that provides the needed Agility to respond quickly in fast times. Such offering provides the opportunity to reinvent business processes and streamline operations by availing extensive solid reporting capabilities.

Projects' Portfolio Management

Project Management is the modern, enterprise-grade solution for project-centric businesses, with complete and integrated project financial management.

Customer Relationship (Customer Experience) Management

The practice of using tools, technology, and processes to gather and analyze customer data and then use the information to create a better customer experience.

Internet of Things (IOT)

EPRO can help your brand in defining perfect start for your IoT journey. We will help you in understanding the requirements of your businesses and will provide you with the relevant IoT solutions. Our solutions will be highly beneficial to connect all users and machines together through the internet and it will includes quality forecasting analytics, maintenance, assets monitoring, and process optimization.

Smart Homes

We will help you transform your home into a smart home. Our smart system will provide you with the ability to control the entire house, including lights switches, AC switches, power switches, home cinema, and house safety with less efforts and less power.

Mobile App Development

EPRO provides superior quality mobile app development services for businesses across a variety of niches. EPRO offers cutting-edge services in the field of mobile application development across different platforms.

3. Digital transformation

EPRO with digital transformation can help companies to increase revenues, cut costs, improve security, and build new ways of organizing processes. It creates new customer experiences and drives more value to employees.

Social Media and digital marketing

Web/Desktop Application Development

Branding, Corporate Identity and Visual Designs

Top-notch Social Media and Digital Marketing Services Including:

- Visuals Content
- Moderation and media buying

Campaigns that take your business to the next level.

Our Web/Desktop Application Development services start from a simple CMS enabled website to design and developing the most complex Web Applications, E-Commerce Portals, Desktop Applications, and Progressive Web Applications.

Stunning logos and visual identity that follow the global best practices, satisfy all tastes and allow your mind to stand out from the crowd.

Literally all visual designs from printables to digital catalogs, to corporate giveaways and custom products, company profile and product description, All the way to ATL Designs.

Integrated Security Systems

EPRO is considered a leading company licensed by Saudi Public Security and Ministry of Interior to deliver and install the latest security and surveillance solutions with maintenance services as per the regulation and specifications of the Saudi Ministry of interior and according to our comprehensive understanding of the latest technologies in this field and our experience which enables us to design the latest international systems and solutions brands to meet the customer expectations and provide the customer with the global best solutions.

Surveillance Systems

Professional Engineers Company has partnerships with several international surveillance cameras companies, such as Aviglon, Hanwell, Hikvision,. And it has a team specialized in sales and after-sales services to fulfill all customers' requirements.

Access Control System

We provide integrated solutions that help you to control the access to the critical places in your facility, such as the data storage room, through control devices that operate with a password, card or fingerprint.

Metal and Explosives Detection Gates (personnel gates)

They are gates with strong sensitivity to detect explosives or metals for individuals.

Attendance system

EPRO provides the latest solutions, devices and technologies in this field of control and monitoring systems such as fingerprint system, magnetic card and smart card, which are all modern and easy-to-use systems, supported by programs and applications that provide detailed reports for all operations with international standards, we are also through our expertise and highly qualified technicians provide solutions Integrated with the highest standards.

2. Fire Alarm Systems

EPRO provides the latest innovative and integrated fire alarm solutions which fulfil the client requirements which include the Addressable Fire Alarm systems Conventional Fire Alarm systems. We have qualified team who is capable of designing, implementing and maintaining fire alarm systems.

Main Fire Alarm systems types:
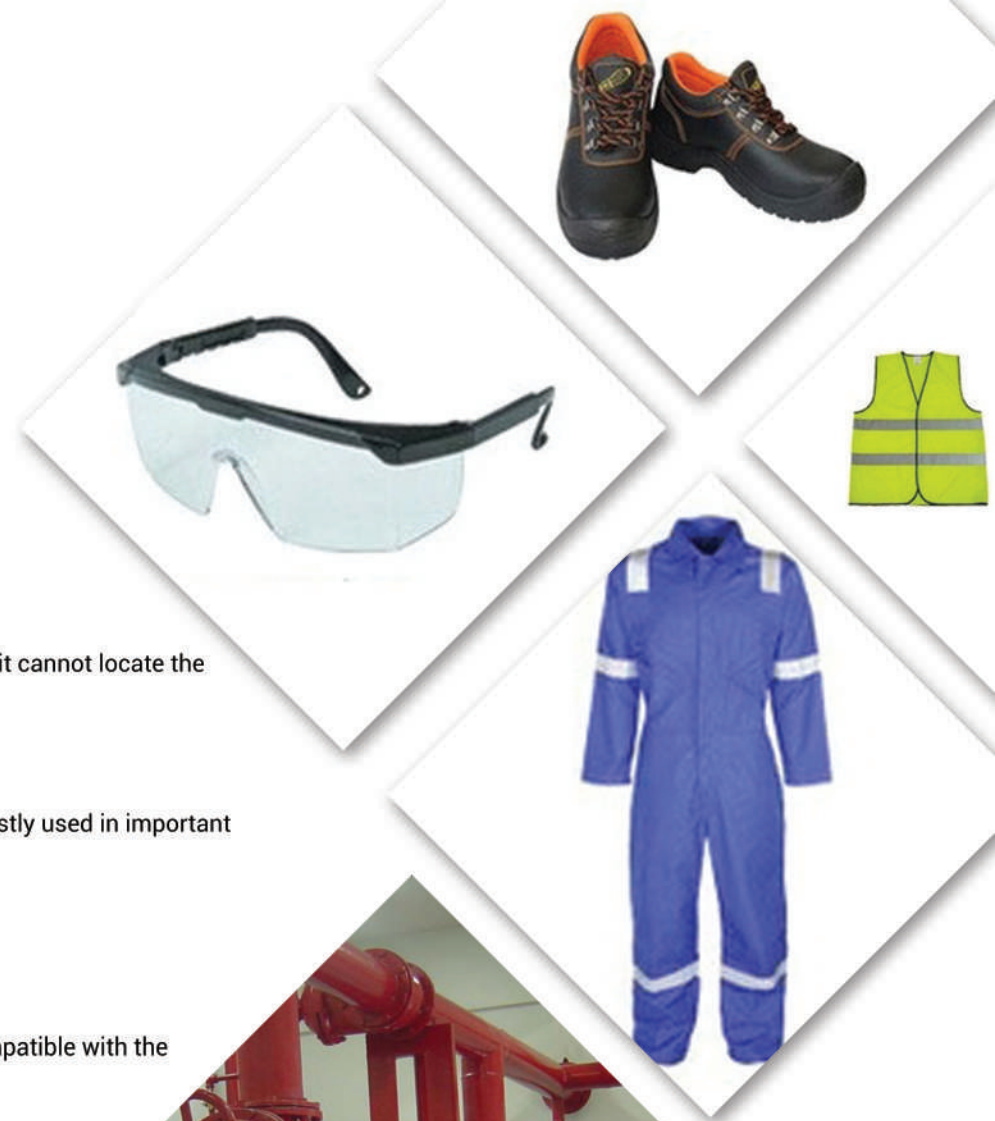

Conventional Fire Alarm system
This system sends an alarm about an entire area where the fire occurred, which consists of several sensors but it cannot locate the exact fire location.

Addressable Fire Alarm system
This system gives each sensor a specific address, thus, it can detect and locate the exact fire location and it mostly used in important places such as government facilities, hotels and towers...etc.

3. Safety Material

Our company provides and delivers the latest high quality personal and professional safety products that is compatible with the National Fire Protection Association specifications.

Solar Systems

We are providing the latest low-cost solar energy systems that are effective and sustainable to protect the environment while ensuring the highest levels of quality, safety and performance. We are also making appropriate feasibility studies for the return on investment recovery of infrastructure costs to meet our client satisfaction

1.Design and installation of solar systems

- ✔ On grid systems
- ✔ Off Grid Systems
- ✔ Solar Water Pumping System
- ✔ Solar Lighting Systems
- ✔ Solar Systems for Mobile Networks
- ✔ Solar Water Heating Systems

2.Delivery of All Solar Systems Products

- ✔ Solar Panels
- ✔ Solar Panel Mounting Structures
- ✔ Off Grid inverters
- ✔ Batteries
- ✔ Solar water heaters
- ✔ Solar Street Lights

3. Engineering consultancy

. Design all types of solar systems

. Design Single Line Diagrams for solar systems plants

. Design Audit for solar system plants up to100 MW

. Prepare a three dimensional drawings for designed plants

. Provide proper solutions for small sites

. Prepare a full report for plants designed by specialized simulation software.
